Has the instructor been effective?

17 responses

Yes

yes

He has been effective.

Yes. He understood the difficulty of English learners and it was helpful for me to put subtitles.

Very much.

Yes, I believe the instructor has been very effective because they give us detailed explanations about the topics that we are learning, as well as raise many interesting questions for that allow the students to think deeper about the topics.

Yes with mentimeter

Yes, Professor Salton has made sure everyone (including me) feels comfortable in class. Sometimes other professors will force us to turn our cameras on which makes me uncomfortable at times, and I really

How can the instructor improve this course?

17 responses

By reflecting on other parts of history.

6 people were a little too many at the time of the discussion. It was hard to speak and some people did not participate. I think that 4 people are better. Also, sometimes I could not understand what you said when you read students' questions in chat. I think it is better to send the questions to chat for everyone.

Instructor can improve this course by including more assignments that breaks down the reading because some of the readings were difficult.

By making slides more efficient

Since there is ample time for discussion in class, sometimes the class fell behind schedule.

Maybe more challenging mentimeter questions

A brief explanation about the required readings might help students to read smoother.

Perhaps by having more structure in the course, although I felt as if his lectures were very organized with

How does this instructor compares with your other instructors?

17 responses

He looks interested in the topic he's teaching

I could understand that you respected students so much such as considering English learners and considering both students who like discussion and students who are not good at talking with unknown people.

I wanted to speak in the class but I could not because I was overwhelmed by great English speakers. I could speak in other class because the instructor give students some questions that can be answered shortly.

Provides more concern and help comparing to some of the other instructors.

I loved his class the most through out this semester

This instructors' class had more chances of participation (discussions/questions/opinion-sharing) than the other classes I took.

Better mentimeter is a great way to interact students who have great opinions but do not want to speak up

There were no difficult terms and even if there were, the instructor explained it very well.

Is there anything peculiar/special about this instructor (negative or positive)?

nothing in particular

I enjoyed your class!

Thank you so much for the classes, u are the best!

I liked how this instructor made a great emphasis of "looking at events from many perspectives" during this course.

All positive

No

I felt as if participating and expressing our opinions using mentimeter was very effective. I have experience using mentimeter in other classes before for quick surveys in class, but mentimeter has never been a primary tool in sparking discussions, and making those who are usually shy be able to express their opinion in class.
