19. Has the instructor been effective?

47 responses

Yes.

Yes

yes

Very effective all around. Loved taking his autumn semester course as well!

The professor has been effective in the point that he offers the well-structured course, preparing PowerPoint slides and letting us make some comments on Mentimeter.

Yes, I especially like how you provide us slides which I use to review after class. The short videos on YouTube are also very effective for my learning as well.

Yes. He motivates me to study harder.

Yes, he did explain clearly in the lecture and provided us with sufficient amount of materials to understand the subject.

20. How does this instructor compare with your other instructors?

47 responses

Explains concepts more clearly, tests are more based on critical thinking than memorization

He encourages us to do lots of critical thinkings and clearly makes feedbacks on what is good about my understanding of the course.

gives more examples

Other classes have constant discussions.

He cares about the students more than other professors. I was surprised to see the detailed feedback of the midterms.

Lectures are clear and easy to understand

Compare to other instructors, he was more effective in terms of student participation such as using menti.com.

I like how he uses mentimeter to get all the responses but I feel like those comments should be mentioned

21. Is there anything peculiar/special about this instructor (negative or positive)?

47 responses

Allows students to debate with him and develop our critical thinking skills (positive), provides very specific feedback on tests that most professors don't do

I appreciate the professor using Mentimeter because not only can I show my point of view about the topic but also I can know how other students think about the topic.

Slides are very useful.

takes his time (positive/good)

I like the use of mentimeter and how we can visibly see the results of what other students think. It's also interesting to look at their answers.

As mentioned above, he tries to look at all students equally even though they might not be able to make comments in class. He picks up all the questions on the chat and responds to our message very neatly. I am very pleased with that.

Doesn't ask his students to come up with solutions to world problems

22. Please provide any suggestion/s on how to improve this course.

n/a

None

It might be good to sometimes (not every class) put students into groups and let them have a brief discussion.

It's not really a suggestion, but I'm finding the new readings a little difficult.

I would be happier if he would give us more time to think of the comments. I want to unmute myself and say the comment but every time I'm ready to answer, he moves on to the next. However, recently, he gives us more time to think of the comments so I am happy.

Idk

It might be better if there was a opportunity to interact with peers. (Not necessarily zoom breakout. Thread on the moodle may be more convenient for some students.)

This is the end of the survey. Thank you for your cooperation!
